Rus,

Using John's list as a start and after reviewing a range of approved bait station labels, we are currently requiring the following information on bait station labels:

1. product name
2. reg. number
3. required text for the specific tier level that also appears on Front Panel of Outer Label per RMD. [We do not mention a specific tier number.]
4. active ingredient statement
5. Signal word
6. referral to full labeling
7. "Do not allow children or pets to play with the bait stations" (Tier 1, 2, and 3). or "Keep Out of Reach of Children" (Tier 4)
8. Net weight of block
9. "This bait station can only be refilled with the block bait sold with this station. [refillable stations only]"

Note: Registrants may also put other text on label, such as "Batch Code".

Thank You,

Daniel B. Peacock, Biologist

Is there guidance somewhere for what must be on a bait station's label?

Just trying to see if there is specific requirement for what labeling should be on a protecta rtu station once it is installed. Is the printing that comes on the rtu sufficient or is it required to have additional information? According to the rodenticide label it just states it must be placed in childproof station. Reading label requirement it appears that the protecta rtu meets this requirement. Thanks for your help.

Bob
